

## GUIDOLIN GIROTTO SRL

Guidolin Girotto srl is a market leading company in technical flexible materials converting. We are specialized in designing and manufacturing flat-bed and rotary die cutting machines for kiss cutting and total cutting, and we offer a wide range of cutting solutions for materials in rolls or stripes. We are leader in the manufacturing of flat die-cutting machines for kiss-cutting and total-cutting on steel with cutting plates from 200 to 600 mm., power from 5 to 35 tons with cycles per minute from 30 to 150. We manufacture rotary die-cutting machines 175 mm and 250 mm wide, studied and developed for die-cutting all kinds of technical adhesive and not adhesive materials. These machines can be used in many fields because, besides the standard models, they are projected "to measure" in order to satisfy the different problems of the customers. For the last 20 years we have been working on two main objectives: the technical accuracy of our machines and our customers satisfaction, and we have always succeeded in achieving them. Our technical skills and the great experience on the field allow us to constantly develop innovative strategies in cutting solutions and in our machines range, in order to satisfy requirements of high and complex productions by ensuring speedy and high cutting precision. High structural quality, accurate die-cutting precision, silence, power and excellent relation between quality and price are the best presentation of our die-cutting machines in the world. Our production includes also automatic cutter machines model GD X1, cardboard cores cutter machines model GD TR7, continuous laminating systems model KK, continuous rewinding systems model K1.
