

TECNOFOIL SRL

SERVICE AND QUALITY.

Available on the market a new hydraulic press with automatic upload and download for hot stamping and punching of small series.

Tecnofoil srl is a company specialized on the supply of hot stamping foils and equipments and it's glad to present at Grafitalia 2008 the new hydraulic press with automatic upload and download of sheets from pallet.

We have tried to satisfy a requirement of the market so to hot print and personalize small lots of production, shoppers, envelopes etc. with the best relation quality/price.

The machine that we are going to present will have reduced dimensions but it will be followed by a bigger press with a heating head of 700 x 1000 mm.

Tecnofoil srl will show also all its entire range of products which is based in particular on hot stamping foils (holographic, metallic, pearled, pigments etc.), silicone and metallic dies, stamping pads and varnishes. We will present also a new line of products for cold stamping, special papers and our useful cutting rolls machines.
